

To international visitors who are not Japanese health insurance holders

We request that all international patients who do not hold valid Japanese health insurance are to arrange with a medical coordinating company in Japan before visiting us in order to ensure patient safety and quality care.

To ensure smooth performance in providing medical services, we have established a business partnership contract with Accredited Medical Travel Assistance Company (AMTAC) which is accredited by Medical Excellence JAPAN. Through this agreement, a designated procedure for visiting and making an appointment with us is agreed to in principle between our Hospital Administrative Office and AMTAC. Therefore, please contact AMTAC directly if you are not a Japanese health insurance holder; for example, when you are ineligible due to being a non-resident of Japan. In addition, please understand that we will instruct you to contact AMTAC even when calling our appointment center directly.

Thank you for your cooperation.

◎ AMTAC
